Occupational Health

Vision Zero Forum

Vision Zero work since year 2003

@NollaTapaturmaa

Finnish Vision Zero Forum

is the most significant network for continuous improvement of occupational safety in Finland

The starting point for the forum's activities is Vision Zero, which means a long-term commitment and positive attitude towards the development of work, safety, health, and well-being. In workplaces committed to Vision Zero, improving occupational safety is an ongoing activity regardless of the starting point.

OUR VALUES

Openness

**Learning
together**

**Encouraging
each other**

- We promote a positive safety culture
- We disseminate the latest information on occupational safety trends
- We share benchmark data and best practices
- We produce tools and materials for successful work
- We offer a national and regional member network

Vision Zero

Zero tolerance
of workplace bullying

Zero sickness
absences due to work

Zero no-flow
working days

Zero accidents

Zero job
burnouts

Zero harmful
exposures

Zero supervisors and employees
unaware of occupational safety

Commitment of members

We commit ourselves to sharing information on best practices with other workplaces

We will improve our workplace safety in co-operation with our employees and management

Health and safety are an integral part of our workplace's successful business operations

We commit ourselves to annually providing the Zero Accident Forum's project team with information on occupational safety

Benefits for the members
